## Profile

IT infrastructure and cybersecurity professional with hands-on experience in vulnerability validation, remediation planning, compliance support, and security reporting in enterprise environments. Currently studying Network and Cyber Security Engineering. At Hitachi Rail Denmark, gained practical exposure to railway systems and secure operations within the Banedanmark lab environment. Available for full-time employment immediately; bachelor's thesis completed in May 2026.

## Professional Experience

11/2025 – 06/2026  
Copenhagen, Denmark

### Cybersecurity Intern Hitachi Rail

- Validate vulnerabilities and targeted security tests to confirm exploitability, business impact, and compliance gaps.
- Develop remediation plans using CVSS scoring, asset criticality, and applicable security requirements.
- Coordinate patching and hardening with system owners and re-test controls to verify closure and risk reduction.
- Produce security documentation and reports for technical and non-technical stakeholders.
- Support security assessments and compliance work aligned with ISO/IEC 27001, ISO/IEC 27002, and NIS2-related requirements.
- Build railway-domain understanding through work in the Banedanmark lab environment and awareness training on cybersecurity and railway systems.

2023 – 01/2025  
Copenhagen, Denmark

### IT Support (Part-Time) KK-Entreprise

- Support network, hardware, and software issues in day-to-day operations.
- Manage incidents and requests through an internal ticketing system for logging, tracking, and escalation.
- Assist with ISO 27001-aligned protocols, access reviews, and compliance audits.
- Deliver security awareness guidance to end users.

2023 – 2024

### Security Project Linnaeus University

- Document project architecture, security policies, and test results and present outcomes in a team setting.
- Build Power BI dashboards for SIEM log analysis, security incidents, and threat trends.
- Design firewall and IDS rules and conduct testing simulations using Wireshark and Kali Linux.
- Develop a JavaFX monitoring application and a microcontroller-based alarm system with API alerts.

## Education

08/2023 – 05/2026  
Sweden

### B.Sc. in Computer Science (Network & Cybersecurity Engineering) Linnaeus University

Selected coursework: Internet Security, Cryptography, Computer Networks, Systems Administration, Computer Security, Computer Forensics, Cybersecurity & Compliance, Operating Systems Security, Network Security, Threat Intelligence & Risk, Database Security, and IoT Security.

## 📌 Certifications

|      |                              |
|------|------------------------------|
| 2025 | CompTIA CySA+                |
| 2025 | Microsoft Power BI (PL-300)  |
| 2024 | CCNA                         |
| 2024 | CompTIA A+                   |
| 2024 | Microsoft 365 Administration |

## 🔧 Technical Skills
